Recycled Planting Pot

Materials: Small or medium sized can (for example: tomato paste can or soup can), old newspaper, scissors, planting soil, measuring cups (use hands if there are no measuring cups), and seeds of your choice

Directions to assemble the pot:
1. Cut newspaper into thirds, lengthwise.
2. Place can on newspaper, leaving about an inch at the top of the can
3. Roll the can along the newspaper, loosely so the can with be removed easily

4. Fold the edges of the newspaper down over the can – it is okay if there is a small hole, this will provide drainage for the seedling
5. Slide the can out

After the pot is complete, add the soil and seed of choice!
